# Group D

Project Title: Trade My Skill

Team: Parsa, Toni, Alden, Fairuz

# Problem, Goal and Stakeholders

- **Problem:**

Learning new skills is difficult for beginners because information online is **scattered and overwhelming**. Many platforms are either **too expensive, too advanced, or lack interaction**, making it hard for learners to receive guidance or feedback.

- **Goal:**

Our goal is to build a skill-sharing platform where users can:

- Learn new skills from others
- Teach skills they already have
- Connect with a supportive learning community

# Stakeholders

- **Primary Users**
- Students
- Hobbyists
- People who want to learn or teach skills
- **Secondary Stakeholders**
- Platform administrators
- Developers maintaining the system
- Educational communities interested in peer learning

# System Overview & Key Features

- **System Overview:**

Our platform allows users to **learn and teach skills through peer collaboration**.

- **Key Features:**

- Create Profile
- Browse or Create Listings
- Propose Skill Trade
- Connect and Communicate

# System Design (MVC and Layered Web App)

- **View (Frontend):** Home, Signup/Login, Browse Listings, Create Listing, Messages, Profile
- **Controller (Backend API):** Handles requests for auth, listings, proposals, messaging; validates inputs
- **Model (Database):** Users, Skills, Listings, TradeProposals, Messages (and Reviews optional)
- **Security:** Authentication + authorization (users can only edit their own listings, etc.)
- **Main user flow:** Browse → Propose → Message → Trade Completed

# Minimum Viable Product (MVP)

- **Core Features:**

User Registration and Login, Skill Profile, Skill Listings, Search and Browse, Basic Messaging

- **Future Features (Not in MVP):**

- Ratings and reviews
- Video call integration

# SELF REFLECTION

- WHAT WE LEARNED

1. Importance of planning before coding
2. How scrum workflows helps teams stay organized
3. Importance of breaking larger problems into smaller tasks

- WHAT WE LIKED

1. Creating the UI/UX design
2. Brainstorming ideas for trademyskills
3. Learning new ways to plan projects

# User Questionnaire
